Overview

My research interests broadly lie in Deep Learning within real-world applications and challenges such as medical and healthcare applications. My current research focuses on Computer Vision methods (Object detection) in detecting lung nodules for lung cancer in CT scan images. Also, I have authored a paper in this field and collaborated on a few other papers in the context of real-time emotion recognition (Image classification).

Research interests: Deep Learning, Computer Vision, Medical Applications in Deep Learning

Education

University of Science and Culture, Tehran, Iran M.S., Data Science Thesis: Few-shot lung nodule detection. GPA: 4 of 4 (19.05 of 20)	Oct. 2021 - Expected Feb. 2025 Advisor: Dr. Alireza Rezvanian
Technical and Vocational University, Tehran, Iran B.E., Electronics engineering (Shamsipour College) Project: A smart house remote control using Arduino.	2018 - 2021 Advisor: Dr. Mahdiyar Nouri Rezaie
Technical and Vocational University, Karaj, Iran A.S., Electronics engineering (Beheshti College)	2016 - 2018

Publications

(Accepted) Saeed Shakuri and Alireza Rezvanian. "An Efficient Approach in Detecting Lung Nodules Using Swin Transformer." 19th Iranian Conference on Intelligent Systems (ICIS), IEEE, 2024.
(Published) Omid Ghadami, Alireza Rezvanian, and Saeed Shakuri. "Scalable Real-time Emotion Recognition using EfficientNetV2 and Resolution Scaling." 10th International Conference on Web Research (ICWR), IEEE, 2024.
(Under Review) Omid Ghadami, Alireza Rezvanian, Saeed Shakuri, and Mohammad Shamami. "Real-time facial emotion recognition in smartphones using EfficientNetV2 and quantization-aware training." Multimedia Tools and Application, Springer.
(In preparation) Saeed Shakuri and Alireza Rezvanian, "Lung Nodule Detection Using Few-shot Learning and Swin Transformer." to be submitted to Computerized Medical Imaging and Graphics.

Teaching Assistant

Information Retrieval on the Web (Graduate class) University of Science and Culture	Fall 2024
Artificial Intelligence (Undergraduate class) University of Science and Culture	Fall 2023
Machine Learning (Graduate class) University of Science and Culture	Fall 2022

Notable Academic Projects

All of the projects were implemented with Python in Google Colab
Object detection with Detectron2 Link: https://github.com/SaeedShakuri/Detectron2
Measuring sentence similarity with a TF-IDF approach Link: https://github.com/SaeedShakuri/ML-DL-Projects/tree/main/NLP
Image classification and object detection projects using PyTorch Link: https://github.com/SaeedShakuri/Computer-Vision
A classification project using Ensemble Learning with the Abalone dataset Link: https://github.com/SaeedShakuri/ML-DL-Projects/tree/main/Ensemble%20Learning

Professional Services

Reviewer Elsevier - International Journal of Electrical and Computer Engineering Wiley - The Journal of Engineering Elsevier - Data in Brief Journal	Oct. 2024 Aug. 2023 Mar. 2023 - Apr. 2023
Judge University of Science and Culture • Judging the final projects of computer science undergraduate students.	Jul. 2023 & Jan. 2024
Invited Presenter University of Science and Culture • Presentation title: An Introduction to Few-Shot Learning	Dec. 2022

Skills

Programming Languages Python, Dart, C	
Softwares and Tools Google Colaboratory, EndNote, LaTeX, MiniTab, VSCode	
Technological Proficiencies PyTorch, Detectron2, OpenCV, NumPy, Matplotlib, Flutter	
IELTS Academic (Taken in Sep. 2023) Overall: 7, Speaking: 7.5, Listening: 7, Writing: 6.5, Reading: 7	

Masters Courses

All of the courses received a grade of <u>4 out of 4</u>:	
• Natural Language Processing	Spring 2023
• Computer Vision	Fall 2022
• Computational Social Network	Fall 2022
• Artificial Neural Networks	Spring 2022
• Machine Learning	Spring 2022
• Seminar	Spring 2022
• Data Science Mathematics	Fall 2021
• Advanced Algorithms	Fall 2021
• Applied Data Analysis	Fall 2021
